

WALL & FLOOR PRINTER

COMPANY PROFILE

Suzhou Tanyu Technology Co., Ltd. was established in 2012. It is a high-tech enterprise focusing on the research and development, production, sales and service of wall and floor printing machines. The company is located in Nanjing and it has a modern production base and a professional team with high quality and innovative spirit.

Since 2012, we have been fully committed to the research and development of wall painting machines. Our R & D team is composed of experienced engineers, designers and technical experts. With their persistent pursuit of advanced technology and innovative design concepts, they are committed to creating wall painting equipment that can print beautiful pictures and photos with high quality on various planes.

TANYU

Responsible for processing, assembly, testing, and shipping

Our machines strictly follow high-quality production standards to ensure that each device has stable performance, reliability and durability.

Second, our wall painting machines can accurately present rich and delicate colors and clear images, bringing high-quality wall painting works to users.

Third, with a simple operation interface, we are committed to creating the world's leading wall painting machine. It combines advanced printing technology and an intelligent operating system. Its operation interface is simple and intuitive. Whether it is a professional designer or an ordinary user, it can be easily used without complex training, truly realizing the convenience and low difficulty of use.

We are customer-first and provide all-round pre-sales consultation and after-sales service. Before sales, our professional sales team will provide customers with detailed product introductions and personalized solutions according to their needs and actual situations. After sales, we have an efficient technical service team that can solve problems encountered by customers during the use of the equipment at any time, ensure the normal operation of the equipment, and guarantee the smooth progress of customers' use and creation.

Our machines are widely sold in many countries and regions overseas, such as Germany, the United Kingdom, France, the Netherlands, Switzerland, Italy, Slovakia, the United States, Canada and other European and American countries, as well as Brazil, Argentina, Chile and other South American countries and Southeast Asian countries, and are widely praised by all our customers.

We always firmly believe that innovation is the core driving force for the development of enterprises. Therefore, we continuously invest resources in technological research and development and product upgrades to adapt to market changes and the continuously increasing needs of customers. At the same time, we also attach great importance to customer feedback and take it as an important basis for us to continuously improve and upgrade products and services, and are committed to providing customers with more high-quality and satisfactory wall painting machine products and experiences.

PACKING AND SHIPPING

ASSEMBLY AND TESTING

1. EXCELLENT CUSTOMER SERVICE:

Customer satisfaction is our eternal pursuit. To this end, we have built a complete customer service system, providing a full range of personalized service, completely eliminating customer worries.

2. ADVANCED TECHNOLOGY AND QUALITY ASSURANCE:

In the field of technology research and development, we continue to invest a lot of resources, and always maintain the industry's leading level. At the same time, we strictly follow the international quality standards, carefully control every link, and strive to achieve excellent quality.

3. HIGH PRECISION AND PERFECT PRINTING:

Using advanced printing technology, the pattern details are clearly distinguishable, the color is bright and the transition is natural and smooth, no matter the fine lines or the complex color combinations, they can all be presented precisely and perfectly using advanced printing technology.

4. EFFICIENT AND CONVENIENT CONSTRUCTION:

Significantly reduce the construction cycle, compared with the traditional hand-painted, can be completed in a shorter period of time large area wall painting work, in order to improve efficiency while effectively reducing costs.

TANYU

WALL PRINTER

ITS POWERFUL FUNCTIONS WILL OPEN UP A WONDERFUL
AND EXTRAORDINARY PRINTING JOURNEY FOR YOU.

CREATE

WALL PRINTER

TWF1000 WALL AND FLOOR MACHINE

This machine can print on walls as well as on the ground. It is easy to operate and can meet your needs in different printing scenarios.

A close-up view of the top deck of the F1000 robot. It shows a long, black sensor rail with several small, colorful sensors (red, green, blue) mounted along its length. A camera is mounted on the right side of the rail. The text "F1000" is visible in the bottom right corner.

TANYU

The unique wall-to-floor conversion design

The unique wall-to-floor conversion design, coupled with the quick-install connection between the machine head and the column with a slider, makes the wall-to-floor conversion fast and efficient, and the operation is under control. It meets the printing needs of different scenarios and expands more application space for you.

TANYU

Upgrade the servo motor

The upgraded servo motor has lower noise, stronger torque, and a new level of control accuracy. It brings excellent printing quality, whether it is fine patterns or complex designs, it can be perfectly presented, ensuring that every print is a high-quality output.

TWF-1000

TANYU

Ergonomic design

The ergonomically designed TWF 1000 can be easily converted by computer. In the debugging stage before printing, one person can complete the debugging operation, which saves worry and effort. Let you complete the printing preparation work independently without relying on others.

WALL PRINTER

TANYU

Upgrade to aluminum alloy rails

It is upgraded to an aluminum alloy guide rail, and the printing stability is significantly enhanced. It presents you with clear and accurate printing effects and ensures the stable quality of each print.

TWF-1000

Spring wire

The spring wire is used, and only one wire needs to be plugged in each assembly. It is both beautiful and eliminates the trouble of frequent wiring, making the assembly process smoother. It provides a convenient user experience and makes your operation easier.

Reserved storage space on chassis

The chassis reserves more space for placing some urgently needed items when printing. The thoughtful design brings you an excellent printing experience and makes your work more handy.

Model	TWF1000	Ink Bag Capacit)	260ml per color
Printing Technology	Piezoelectric DOD (Ink on Demand) inkjet technology	Noise emission	Approx. 40 dB(A)
Ink Type	UV eco-friendly ink		
Printhead Manufacturer	EPSON	Ambient temp	-10°C-60°C
Print Head Type	DX10,I1600	Relative Humidity	"10%-80% relative humidity, non-condensingstate."
Dropsize	3.5PL	Amount of print heads	2/3 Optional
Vertical Height	Standard 3 meters	Color	Cyan, Magenta, Yellow, Black, White
Guide Rail	Standard 6 meters	Horizontal Printing Resolution	180,360,720,1080,1440,2080, 2880, DPI selectable
Correction of wall unevenness	UP to 3cm	Vertical Printing Resolution	180, 360, and 720,DPI selectable
Wall Distance Control	Two Laser sensors for automatic wall shape compensation	Printing speed	2~16 sqm/h
Ink Curing System	UV Lamp	Origin	China
		Multi-Pass Printing	4 , 6, 8, 12, 18 and 24 Pass-Support
Image Formats	PNG,JPG,PSD,AI,TIFF		
Image Processing software (RIP)	PhotoShop	structure	Structural all aluminum
os	Windows 10	Printing technology	VSDT variable ink drop technology, high fault tolerance feathering technology, automatic recovery printing technology"
OS Mainboard	Cortex-ARM 64-bit, Quad-core, 1.5 GHz, 4 GB RAM, 128 GB		
RIP system	BetterPrinter	orientation	Infrared laser localization
Power Requirements	100-240V AC, 50-60 Hz	weight	Machine 75.36kg, guide rail 24.8kg (each guide rail 6.2 kg, a total of 4 guides)
Power Consumption	Max.250W, 20W Standby		
Operator Control	Computer control		
Operator Control Language	English, Arabic, French, Korean, Portuguese, Russian, German, Russian, Spanish, Thai, Vietnamese		
Printdirection	Bidirectional		
Printhead Temperature Control	Optional		
Print head voltage	Fully Digital Controlled		
Ink Drop Control	RIP System

TWF-1000

TANYU

Innovative eco-friendly pigments allow you to create safely and freely

The UV inks we use will enhance your experience. As with all components of the Wall printer ecosystem, they are held to very high standards and exacting requirements. The Wall printer uses EPSON brand UV ink.

EPSON inks are ideal for wall printing because they cure in a very short period of time and are scratch and erosion resistant. The printing can guarantee indoor 10 years and outdoor 5 years. All patterns printed on the Wall using the Wall printer can be repainted at any time. You can print them out at any time and then reprint them over and over again.

The UV ink used by the Wall printer is suitable for almost any scene. Because it is sterile and resistant to wear and tear, the walls of children's rooms, doctors' offices, and museums can also be printed without concern.

SUSTAINABLE DEVELOPMENT

Innovation Convenient Environmental protection

It is important for us to know all of our suppliers so that we can ensure that our parts are completely transparent and open and as independent of the world market as possible. Most parts of Wall printer are from suppliers in China, which enables us to deliver and replace parts for you as soon as possible.

The Wall printer stands for high-tech and environmental protection. We also see ourselves as a role model for other companies. We adhere to the goal of innovation and environmental protection to our employees and our suppliers. It's not just good for nature. After all, imagine how surprised you will be when you see that after a successful print job, there are no piles of scrap around with mountains of film made of PVC.

Artistic Portraits

This work is full of artistic tension, and every detail seems both real and abstract

She is like a touch of soft color on the canvas, light and mysterious. Her bright eyes are like a window through the world, deep and full of stories, as if every moment reflects the light and shadow of the years. Her face is delicate, her curves are elegant, and she exudes an indescribable tranquility and strength. Every strand of hair is like a line carefully painted by the painter, soft and naturally drooping, complementing her temperament.

Her smile carries a hint of sadness, as if hiding countless unspoken poems. That kind of beauty is speechless and flowing, like the wind blowing across the water, creating ripples. Under the projection of the light, her skin exudes a soft luster, like a flowing oil painting, both realistic and dreamy. Every touch of color on her body seems to blend with the art of the background, becoming part of the overall picture removing brush.
